Progress Report on the Class of 2003

Background

The Education Reform Law of 1993 requires that students earn a Competency Determination as a condition for high school graduation. The law states that “The competency determination shall be based on the standards and curriculum frameworks for tenth graders in the areas of mathematics, science and technology, history and social science, foreign languages, and English, and shall represent a determination that a particular student has demonstrated mastery of a common core of skills, competencies, and knowledge in these areas as measured by the [state assessments].”

In January 2000, the Board of Education voted to adopt the following regulation for the Competency Determination:

Students in the graduating class of 2003 shall meet or exceed the Needs Improvement threshold score of 220 on both the English Language Arts and Mathematics MCAS grade 10 tests in order to satisfy the requirements of the Competency Determination. The Board intends to raise the threshold scaled score required for the Competency Determination in future years.

The Education Reform law also states that “If a student’s assessment results for the tenth grade do not demonstrate the required level of competency, the student shall have the right to participate in the assessment program the following year or years.” Accordingly, the Board of Education voted in January 2001 that students who do not earn a scaled score of at least 220 on both or either of the required grade 10 tests be provided a total of four opportunities to retake the test(s) before their scheduled graduation date. Two opportunities are to be provided each year, one in December, and the other in May. As of September 2002, students in the class of 2003 have had a total of three opportunities to earn a Competency Determination: May 2001 (initial test in grade 10), December 2001 (first retest), and May 2002 (second retest).

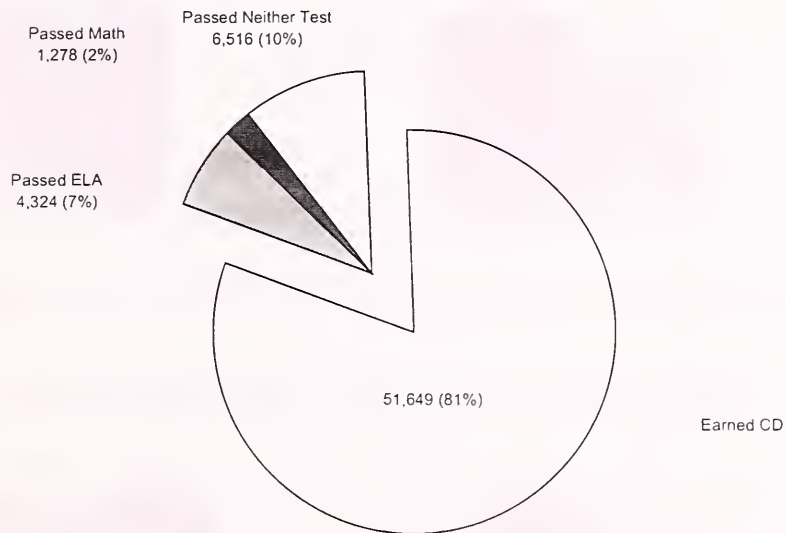

State Results

The table below shows the percentage of students in the class of 2003 who have now earned a competency determination based on the cumulative number of students who have passed the grade 10 MCAS tests administered in the spring and fall of 2001 and spring 2002. The percentage of students in the *original class of 2003* who have earned a competency determination was calculated using enrollment data reported by school principals on the first day of MCAS testing in the spring of 2001. The percentage of students in the *current class of 2003* who have earned a competency determination was calculated using the fall 2001 grade 11 enrollment data reported by districts via the Department’s Student Information Management System (SIMS).

Gender				
Female	32,932	72%	31,917	83%
Male	33,479	66%	31,850	80%
* While the enrollment for students in each racial /ethnic group appears to have grown between the spring and fall 2001, the increase is due primarily to the fact that students who identified themselves as "mixed" or "other" on the spring 2001 MCAS tests may have been reported in one of the five racial/ethnic groups shown in the table by the SIMS in the fall 2001. Combined racial ethnic enrollment figures for the spring 2001 may not equal total enrollment figures, as demographic information was not always available for all students
